

I would like my local Air1 station, 97.7, to be put back in service because my friends and I love listening to it in the car on our way to school, church, and various other places. I was deeply saddened when I heard that it had been removed from the air. If this move stands, the community will be effected in a negative way in that, a positive and clean station will be gone and thus to continue to listen to the music that doesn't bring happiness. They talk about the depressing things in life, when the songs that are played on Air1 are uplifting and can enable a person to become happy. I'm asking you to return it to the air, because I know the effect it will have on the community if it isn't put back on the air, and it won't be positive.
